18	Vedula; Nagender P. et al.	US 6823495 B1		USPAT

	Title
1	METHOD OF COMPILING SCHEMA MAPPING
2	Authoring Arbitrary XML Documents Using DHTML and XSLT
3	System and method for integrated management of components of a resource
4	Method of compiling schema mapping
5	Mapping tool graphical user interface
6	Mapping tool graphical user interface
7	Method, system, and computer product for collecting and distributing clinical data for data mining
8	Extensibility and usability of document and data representation languages
9	Web service syndication system
10	System for dynamically invoking remote network services using service descriptions stored in a service registry
11	Authoring arbitrary XML documents using DHTML and XSLT
12	Method of compiling schema mapping
13	Application program interface for network software platform
14	Function objects
15	Computer directory system having an application integration driver infrastructure
16	Method of compiling schema mapping
17	Method, system, and computer product for collecting and distributing clinical data for data mining
18	Mapping tool graphical user interface

	Title
1	Browsing electronically-accessible resources
2	Authoring arbitrary XML documents using DHTML and XSLT
3	Database access system
4	User interface for integrated spreadsheets and word processing tables
5	Computer directory system having an application integration driver infrastructure
6	Spreadsheet fields in text
7	Network-based software extensions
8	Transaction data structure for process communications among network-distributed applications
9	Dynamic self-configuration for ad hoc peer networking using mark-up language formatted description messages
10	Methods, systems, architectures and data structures for delivering software via a network
11	Metadata driven system for effecting extensible data interchange based on universal modeling language (UML), meta object facility (MOF) and extensible markup language (XML) standards
12	Architectures for and methods of providing network-based software extensions
13	Enterprise integration system
14	Method and apparatus for providing web based services using an XML Runtime model to store state session data
15	Building business objects and business software applications using dynamic object definitions of ingrediential objects
16	Auto-configuring of peripheral on host/peripheral computing platform with peer networking-to-host/peripheral adapter for peer networking connectivity
17	Self-modifying data flow execution architecture
18	Methods and apparatus for parsing extensible markup language (XML) data streams
19	Method and apparatus for providing access to a legacy application on a distributed data processing system

	Inventor	Document ID	Kind Codes	Source

23	Roberts; Andrew F. et al.	US 6560633 B1		USPAT
24	Hartmann; Jean S. et al.	US 6505342 B1		USPAT
25	Draper; Denise L. et al.	US 6449620 B1		USPAT
26	Meltzer; Bart Alan et al.	US 6226675 B1		USPAT
27	Meltzer; Bart Alan et al.	US 6125391 A		USPAT

	Title
20	Synchronization of controlled device state using state table and eventing in data-driven remote device control model
21	Managing an environment utilizing a portable data processing system
22	Method and apparatus for storing semi-structured data in a structured manner
23	Method for creating network services by transforming an XML runtime model in response to an iterative input process
24	System and method for functional testing of distributed, component-based software
25	Method and apparatus for generating information pages using semi-structured data stored in a structured manner
26	Participant server which process documents for commerce in trading partner networks
27	Market makers using documents for commerce in trading partner networks

	Title
1	System and method for intelligent data extraction for telecommunications invoices
2	HARDWARE TRANSFORMATION ENGINE
3	Novel information retrieval systems and methods
4	Unitary data format for measurement devices
5	Techniques for watermarking and distributing content
6	Autonomous policy discovery
7	Normalization and customization of syndication feeds
8	Prevention of data corruption caused by XML normalization
9	Identifying locations
10	Customizable asset governance for a distributed reusable software library
11	Alarm control apparatus
12	Methods and apparatus for converting markup language data to an intermediate representation
13	System and method for cross-referencing information in an enterprise system
14	System and method for evaluating and managing participatory real estate investments and transactions
15	Method and apparatus for automatic grammar generation from data entries
16	Dialoguing rational agent, intelligent dialoguing system using this agent, method of controlling an intelligent dialogue, and program for using it
17	Method for configuring computing devices using reference groups
18	System and method for managing jobs in heterogeneous environments
19	System and method for normalizing job properties
20	Network audit and policy assurance system
21	System and method for estimating prevalence of digital content on the World-Wide-Web

	Title
22	Systems and methods for expressive text-to-speech
23	Systems and methods for contextual mark-up of formatted documents
24	Method for certification of edifice plumbing systems
25	System and method for security information normalization
26	System and method for automated policy audit and remediation management
27	System and method for generating machine auditable network policies
28	Integrated system and method for selectively populating and managing multiple, site-specific, interactive, user stations
29	System and method for interfacing with heterogeneous network data gathering tools
30	System for normalizing and archiving schemas
31	Schema framework and a method and apparatus for normalizing schema
32	Page layout markup language
33	System and method for providing and displaying information content
34	System and method for displaying information content with selective horizontal scrolling
35	Filter architecture for rapid enablement of voice access to data repositories
36	Voice message system and method
37	System and method for managing memory
38	Method and apparatus for XML data normalization
39	System and method for distributing services for knowledge management processing
40	Knowledge gathering system based on user's affinity
41	System and method for mapping knowledge data based on user's affinity to knowledge
42	System for categorizing and normalizing knowledge data based on user's affinity to knowledge

	Title
43	System for organizing knowledge data and communication with users having affinity to knowledge data
44	System for synchronizing of user's affinity to knowledge
45	System and method for using XML to normalize documents
46	System and method for processing data in a distributed architecture
47	Transcoding information in a first markup language into a second markup language
48	Integrated system and method for electronic speech recognition and transcription
49	Application platform for developing mono-lingual and multi-lingual systems and generating user presentations
50	Computer-implemented HTML pattern parsing method and system
51	Computer-implemented web page summarization method and system
52	Flexible multi-network voice/data aggregation system architecture
53	System and method for using XML to normalize documents
54	System and method for processing data in a distributed architecture
55	System for synchronizing of user's affinity to knowledge
56	Web-based file review system utilizing source and comment files
57	System and method for accessing customized information over the internet using a browser for a plurality of electronic devices
58	Weighted term ranking for on-line query tool
59	Intellectual asset protocol for defining data exchange rules and formats for universal intellectual asset documents, and systems, methods, and computer program products related to same
60	Hybrid category mapping for on-line query tool
61	Query translation system for retrieving business vocabulary terms
62	Method for performing a data query
63	Method and system for storing and managing sets of objects

	Inventor	Document ID	Kind Codes	Source
64	Lamburt; Leonid	US 6578056 B1		USPAT

74	Schulze; Bruno M.	US 6167369 A		USPAT
75	Chung; Jin-Chin et al.	US 6115686 A		USPAT

	Title
64	Efficient data transfer mechanism for synchronization of multi-media databases
65	Method for using data from a data query cache
66	Generic object for rapid integration of data changes
67	Techniques for performing incremental data updates
68	Method and system for performing online data queries in a distributed computer system
69	Method and product for performing data transfer in a computer system
70	Common term optimization
71	Data enhancement techniques
72	Adaptive partitioning techniques in performing query requests and request routing
73	Data merging techniques
74	Automatic language identification using both N-gram and word information
75	Hyper text mark up language document to speech converter
